MID-TERM MEETING IN PRAGUE

On 25-26th March 2023 all partners met in Prague, Czechia to analyse the project progress and decide on further actions. As we are working on the Training Modules, the Turkish partner presented and explained the templates for the tasks.

Result 1

During the 2 day meeting, we looked at the distribution of tasks and for the Training Manual for Teachers and Parents and the Development of the Educational Content of the Platform. We reviewed the the tasks and video allocation for each partner and we evaluated the dissemination activities.

TOYZONE PROJECT

Starting from the idea of social marginalization of people with disabilities and from the accentuation of these conditions due to the pandemic with COVID-19, this project was developed to contribute to the educational process of children with disabilities, who currently have limited access to learning activities because teaching them online is a real challenge for both teachers and students with SEN. That is why an e-learning platform will be developed for parents with children with disabilities which to include methods and techniques of working with the disabled child by addressing several work techniques: Montessori, ABA, and PECS.

With the help of the platform, we will reach a large number of parents who will develop their skills and abilities in the instructive-educational and recovery process for their own children.

WORK IN PROGRESS

We are currently developing the Training Manual have nearly finished Result 1 which includes 4 modules, developed for parents of children with disabilities. Parents will develop their competencies in the application of Montessori, ABA techniques, PECS in the therapy applied to the child with disabilities
